

WHAT IS CLAIMED IS:

1. A pest repellent paint containing: at least one extract selected from the group consisting of an extract of a whole plant which belongs to a wintergreen family, an extract of a whole plant which belongs to a nasturtium family, an extract of branches and leaves of a plant which belongs to a myrtle family, and an extract of a whole plant which belongs to a primrose family; at least one paint resin selected from the group consisting of polyvinyl alcohol, carboxymethylcellulose, epoxy resin, urethane resin, and polyester resin; and a paint solvent.

2. The pest repellent paint according to claim 1, wherein the extract is an extract obtained by a solvent including at least an organic solvent.

3. The pest repellent paint according to claim 1, wherein the pest repellent paint has pest repelling capability against pests having sensory nerves.

4. The pest repellent paint according to claim 1, wherein the pest repellent paint is a water paint.

5. The pest repellent paint according to claim 1, wherein the pest repellent paint contains 1 to 30 parts by weight of the paint resin to 70 to 99 parts by weight of the at least one extract, based on a solid content.

6. A pest repellent paint containing: pest repellent particles in which at least one extract selected from the group consisting of an extract of a whole plant which belongs to a wintergreen family, an extract of a whole plant which belongs to a nasturtium family, an

extract of branches and leaves of a plant which belongs to a myrtle family, and an extract of a whole plant which belongs to a primrose family is held by an inorganic carrier; at least one paint resin selected from the group consisting of polyvinyl alcohol, carboxymethylcellulose, epoxy resin, urethane resin, and polyester resin; and a paint solvent.

7. The pest repellent paint according to claim 6, wherein the pest repellent paint is a paint for causing the pest repellent particles to adhere to a base material by applying the paint to the base material.

8. The pest repellent paint according to claim 6, wherein the inorganic carrier is particulate powder formed mainly from a porous inorganic oxide, having a specific surface area of at least $300 \text{ m}^2/\text{g}$, having a silanol group at a surface, and having a grain size of at most $50 \text{ }\mu\text{m}$.

9. The pest repellent paint according to claim 6, wherein the inorganic carrier is particulate powder formed from an intercalation compound.

10. The pest repellent paint according to claim 6, wherein a grain size of the inorganic carrier is larger than a thickness of a dried paint film of the pest repellent paint.

11. The pest repellent paint according to claim 6, wherein a solid matter of the paint contains 1 to 30 parts by weight of the paint resin, 10 to 50 parts by weight of the inorganic carrier, and 49 to 89 parts by weight of the at least one extract.

12. The pest repellent paint according to claim 1 or 6, wherein the pest repellent paint further contains a surfactant.

13. The pest repellent paint according to claim 12, wherein the surfactant includes a
5 nonionic surfactant.

14. An industrial product comprising a sheet having the pest repellent paint according to claim 1 or 6 printed or applied to a surface.

10 15. An industrial product comprising a circuit board having the pest repellent paint according to claim 1 or 6 printed or applied to one or both surfaces.

16. An industrial product comprising a member impregnated or coated with the pest repellent paint according to claim 1 or 6.
